PROFESSIONAL SUMMARY

Full Stack Developer with practical experience in developing scalable web applications using MERN stack and Angular, including real-world projects such as an e-commerce grocery platform and an agriculture marketplace system. Proficient in building RESTful APIs, integrating frontend and backend systems, and designing responsive user interfaces. Holds certifications in AI, cloud infrastructure, and full-stack development, with a strong focus on problem-solving and delivering efficient, user-centric solutions.

SKILLS

- **Technical skills:** C, Java, Python, Full Stack, MERN Stack
- **Professional skills:** Problem Solving, Communication, Time Management

INTERNSHIPS

Full Stack Development (MERN) Intern – SmartBridge

May 2025- Jul 2025

- Built and maintained web applications using MongoDB, Express.js, React, and Node.js.
- Worked on both frontend and backend tasks to develop functional features.
- Tested, debugged, and improved application performance with Git, Postman, and DevTools.
- Collaborated with the team to implement new features and ensure smooth project delivery.

PROJECTS

Fraud Detection System (Machine Learning | Python)

- Developed a machine learning-based fraud detection system to identify anomalous financial transactions.

- Performed data preprocessing, feature engineering, and model training using classification algorithms.
- Improved detection efficiency by analyzing transaction patterns and behavioral anomalies.
- Implemented real-time fraud detection logic, enhancing system reliability.
- Tools & Technologies: Python, Pandas, NumPy, Scikit-learn

◊ **Vehicle-to-Vehicle (V2V) Communication System (Python)**

- Designed a real-time Vehicle-to-Vehicle communication system to enhance road safety.
- Enabled data exchange between vehicles including speed, position, and alert signals.
- Implemented low-latency communication protocols for faster response time.
- Simulated collision warning system to reduce accident risks.
- Tools & Technologies: Python, Networking Concepts

AI-Powered Placement Preparation Portal (Full Stack + AI)

- Developed a full-stack AI-powered web application to assist students in placement preparation.
- Designed and implemented the frontend interface using JavaScript for an interactive and user-friendly experience.
- Built the backend logic using Python and Streamlit to handle user requests and data processing.
- Integrated AI/ML models and APIs to provide personalized recommendations and smart learning paths.
- Implemented features like aptitude tests, coding challenges, and interview preparation modules.
- Ensured smooth client-server communication and data flow across the application.
- Tools & Technologies: Python, JavaScript, Streamlit, AI/ML APIs, Full Stack Development

Certifications & Courses

- Digital Application Fundamentals (STEM) – NASSCOM
- Cloud Infrastructure & AI – Oracle

- Building Your First Chatbot – IBM
- Full Stack Developer (MERN Stack) – Smart Bridge
- Associate Developer with Node.js – MongoDB
- Learn PHP and MySQL for Web Application and Web development – Udemy
- Flutter BootCamp – LetsUpgrade
- Microsoft Excel – Coursera
- Privacy and Security in Online Social Media –NPTEL (IIT)

EDUCATION

B.Tech in Computer Science and Engineering (2023-2027)

Seshadri Rao Gudlavalleru Engineering College, Gudlavalleru
CGPA: 8.98

Intermediate (2021-2023)

Sri Chaitanya Junior College, Machilipatnam | Percentage: 93%

SSC (2020-2021)

Saint Francis English Medium High School(ICSE),Machilipatnam
Percentage:73%
